

# Dog ownership... a cherished American tradition

George Washington had one, and so did Benjamin Franklin.  
But if animal extremists have their way, your grandkids won't.

The radical animal rights agenda is advancing on many fronts, challenging our historic relationships with animals. In the activists' perfect world there are no pets and definitely no purebreds. If they succeed in enacting their worldview, many of our favorite breeds will cease to exist.

**Think it can't happen?** That's part of the problem. And that's why it's so important for lawmakers to rely on mainstream, science-based, hands-on sources for animal policy advice. Contact NAIA today for model laws that protect animals and preserve our beloved breeds for future generations.
